## The Hanson Group PolyLink 4200 Diamine

ATLANTA, GA [August 14, 2003] The Hanson Group LLC, in conjunction with Aceto Corporation, proudly announces the introduction of PolyLink 4200.

PolyLink 4200 offers customers in the Polyurea and Polyurethane markets a convenient alternative to Unilink 4200 at an affordable price. Aceto began manufacturing PolyLink 4200 (which is chemically identical to Unilink 4200) at their world scale production facility in China, and commercial production material has already been qualified in both polyurea and polyurethane applications. "This announcement recognizes the hard work and dedication of all employees at Aceto and The Hanson Group" said Lee Hanson, President of The Hanson Group, LLC. "We created PolyLink 4200 based on the market need for a dependable and financially stable company to provide long term supply of this versatile diamine".

"We are pleased with the agreement between the two companies," said Keith Wilkinson, Vice President of Aceto Corporation. "Aceto's long history of sourcing specialty raw materials and state-of-the-art production facilities along with The Hanson Group's loyal customer base will allow both organizations to be uniquely positioned to accelerate the marketing and distribution of PolyLink 4200."

The Hanson Group LLC, consisting of Ray Scott, Dudley Primeaux, John Leon, Jim Williams and Lee Hanson, will provide technical and customer support for PolyLink 4200. Aceto will provide production management, logistics and financing to maintain a minimum of three to five months domestic inventory at all times of PolyLink 4200.

For more information on PolyLink 4200, please visit: [www.hansonco.net](http://www.hansonco.net)

Aceto Corporation is a global leader in the distribution and marketing of Pharmaceutical and Specialty Chemicals used principally in the agricultural, color, pharmaceutical, surface coating/ink and general chemical industries. Aceto has 35 warehouses located throughout the United States along with offices around the world. The nearly \$300 million publicly traded USA company is listed on the NASDAQ - symbol ACET.
